CAREER OBJECTIVE

JavaScript Developer | front-end / back-end Developer | HTML/CSS & JavaScript | UI & UX | vue.js | node.js | Creates powerful single page applications with React and Redux. | Knowledge of Visual Studio Code, PostgreSQL, and Bash. A motivated web developer who builds dynamic and user-friendly web applications. With a strong foundation in HTML & JavaScript, along with proficiency in React for crafting interactive user interfaces, I'm eager to contribute to innovative projects and expand my skills.

PROJECTS

[Barber Shop Web Design](#)

- Utilized HTML to structure content and create semantic markup, optimizing website performance and user experience.
- Utilized media queries for responsiveness across various devices.
- Implemented JavaScript to create interactive features such as menu toggling, smooth scrolling, and pre-loader functionality, enhancing user engagement and experience.

[Dragon Slayer RPG](#)

📅 Feb 2024 - current

- Employed JavaScript to develop game logic, including character attributes, combat mechanics, and event-driven functionality, ensuring an immersive gaming experience.
- Demonstrated proficiency in DOM manipulation to update game elements such as text, buttons, and statistics, optimizing gameplay and user interaction.
- Demonstrated knowledge of data structures and algorithms to manage game data such as weapons, monsters, and locations, enhancing game performance and scalability.
- Crafted familiarity with game design principles and player experience considerations to apply engaging gameplay and immersive storytelling experiences.

[Music Player](#)

- Implemented JavaScript to develop player functionality, including play, pause, and progress tracking, enhancing audio playback control and user experience.
- Demonstrated understanding of audio element properties and events to control playback and retrieve playback information in real-time, ensuring smooth and responsive audio experiences.
- Implemented functionality to update the progress bar based on the current playback position of the audio track.
- Utilized event handling to enable user interaction with player controls.

WORK EXPERIENCE

Technology Specialist

[The ODP Corporation](#)

📅 August 2015 - current

📍 Portland, OR

- Increased customer satisfaction 10% by answering technology-related inquiries, troubleshooting issues, and providing recommendations.
- Provided technical support and guidance to customers on hardware and software issues, including installation, setup, and troubleshooting 10+ times/wk.
- Helped manage a 4 million+ dollar 20,000 square foot brick and mortar location and reached sales goals metrics such as 30+ rewards subscriptions / week and 5+ business select subscriptions / week.
- Reached AllState protection performance plan and Tech Support Subscription goals throughout 9 years of employment with ODP.
- Generated a recurring revenue of \$129+ per year from each tech serviced client over the past 9 years.
